

# Skeptical Climate Documentary Set to Rock Climate Debate

Anthony Watts / 15 hours ago December 2, 2015

From CFACT:

**President Obama & World Leaders to Be Greeted By New Film Debuting in Paris**

**Gala Paris red carpet premiere for new “Climate Hustle” skeptical documentary**

**Cinéma du Panthéon, December 7, 7:30 PM**

**(Sorbonne, Paris)** CFACT will hold the world premiere of its long-awaited *Climate Hustle* skeptical documentary film at an invitation-only red carpet event in Paris during the UN’s COP 21 international summit on climate change.

Featuring interviews and comments from more than 30 renowned scientists and climate experts, *Climate Hustle* lays out compelling evidence that devastates the global warming scare. Film host [Marc Morano](#), founder and publisher of CFACT’s award-winning Climate Depot news and information service, leads viewers on a fact-finding and often times hilarious journey through the propaganda-laced world of “climate change” claims.

The film is the first climate documentary to profile scientists who have reversed their views from supporting the so-called “consensus” position to a conversion to skepticism. The film also profiles politically left scientists who have now declared themselves skeptics of man-made global warming and United Nations scientists who have now turned against the UN for “distorting” climate science.

David Rothbard, CFACT president and executive producer of the film says, “*Climate Hustle* is the most important climate documentary since Al Gore’s *An Inconvenient Truth*. Gore’s film kicked off a decade of scaremongering junk science. CFACT’s film debunks the scare and clears the way for a return to sound science and rational debate.”

**Nationally syndicated columnist Cal Thomas** calls *Climate Hustle* “tremendous” and says “anyone who still believes in ‘climate change’ after watching this film needs the type of reprogramming given to cult members.”

**Noted climatologist Dr. Judith Curry of the Georgia Institute of Technology**, who is featured in the film, adds “*Climate Hustle* is a refreshing and entertaining antidote to the sillier and alarming claims about climate change and its impacts that people regularly hear from politicians and the media.”

**“Climate Hustle” will premiere at the Cinéma du Panthéon, beside the Sorbonne, on Monday, December 7. A red-carpet ceremony and champagne reception will take place at 7:30 p.m. prior to the screening. The film is planned for theatrical and home video release in 2016.**

Because of very limited space, credentialed media that wish to attend the event should RSVP in advance to Christina Norman of CFACT (cwilson@cfact.org or phone (651) 724-4228). *Climate Hustle*’s host, Marc Morano, along with key scientists from the film, will be available for a short time on the red carpet prior to the event at 7 p.m. and are also available for interviews and comments upon request.

*Climate Hustle*, a production of CFACT, was fully funded by the support of roughly 1,500 citizen supporters. More information is available at [www.ClimateHustle.com/press](http://www.ClimateHustle.com/press)
